

LACQUERED PANELS LUMMIA™

PRODUCT DETAILS

Offered in High Gloss or Perfect Matt finishes, Lummia lacquered panels meet the needs of professionals and consumers more than ever. Their excellent workability, remarkable resistance to scratches and fingerprints, and the wide range of available colours make them suitable for a myriad of applications.

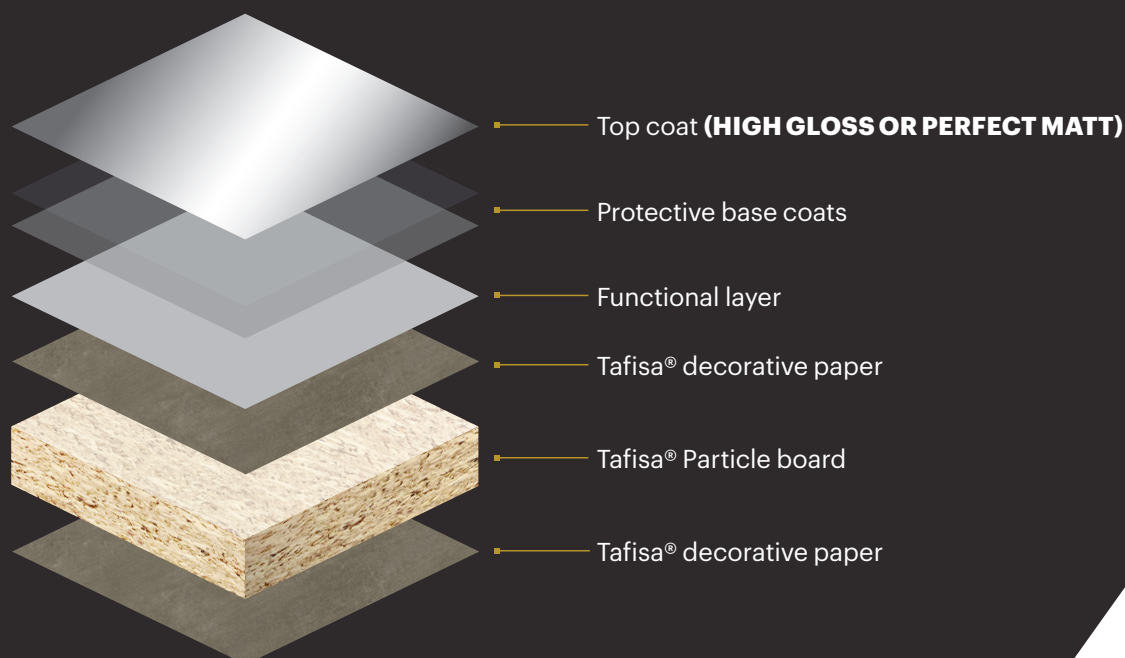

HOW IT'S MADE

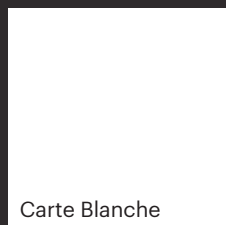

Manufactured in North America

The manufacturing process of Lummia lacquered panels begins with the application of a liquid functional layer onto a decorative TFL panel, followed by adding intermediate layers to protect the surface and enhance the depth effect of the finishes. Layers of lacquer are then applied to create the High Gloss or Perfect Matt finishes. The application of these lacquers involves specific techniques such as calendering for achieving the High Gloss finish and the use of an excimer lamp to create the Perfect Matt finish.
