

LACQUERED PANELS LUMMIA®

PRODUCT DETAILS

Available in High Gloss or Perfect Matt finishes, Lummia lacquered panels meet the needs of professionals and consumers more than ever. Their excellent machinability, outstanding resistance to scratches and fingerprints, and the wide range of available colors make them suitable for a multitude of applications.

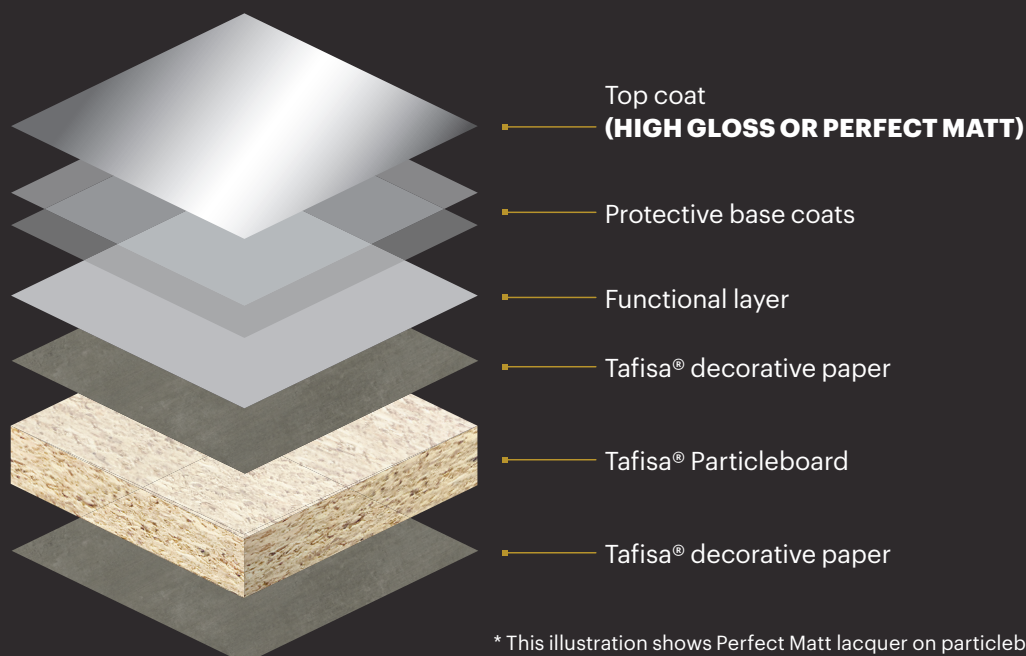

HOW IT'S MADE

Manufactured in North America

The manufacturing process of Lummia lacquered panels begins with the application of a functional liquid layer onto a decorative TFL and/or MDF panel, followed by the addition of intermediate layers to protect the surface and enhance the depth effect of the finishes. Lacquer layers are then applied to create the Perfect Matt and High Gloss finishes. The application of these lacquers involves calendering techniques to achieve the High Gloss finish and the use of an excimer lamp to produce the Perfect Matt finish.
